EXECUTIVE SUMMARY

Full Stack & Mobile Engineer with **4.5+ years of experience** delivering high-concurrency enterprise solutions for **30,000+ clients**. Expert in modernizing legacy architectures and integrating **AI-driven** workflows to reduce operational costs, accelerate development cycles, and drive business efficiency.

TECHNICAL SKILLS

- Frontend & Web:** React, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, SCSS, Tailwind CSS, Atomic Design
- Backend & System Design:** .NET Core, C#, Node.js, RESTful APIs, Microservices Architecture, Java, Spring Boot, System Analysis & Design
- Mobile Development:** Flutter, Dart, Riverpod, GetX, Provider, Swift, Cross-Platform Architecture
- AI & Modern Engineering:** AI Agent Integration (Antigravity, Cursor, Copilot, Windsurf), Embedded LLM Assistants, Prompt Engineering, Accelerated AI Workflows
- Databases & State:** MSSQL, PostgreSQL, SQLite, Hive, Firebase Realtime DB, Zustand, React Query
- Cloud, DevOps & Tools:** Azure DevOps, GitHub, GitLab, CI/CD Pipelines, Docker, Firebase App Distribution, NopCommerce

PROFESSIONAL EXPERIENCE

Düzey Istanbul, Turkey

Senior Software Developer / Full Stack & Mobile Architect | Nov 2022 – Present

- Enterprise Modernization & Cost Optimization:** Spearheaded the architectural migration of legacy Java/Angular projects into a unified .NET Core and React/Next.js/Vue.js engine, consolidating infrastructure and reducing monthly hosting costs by **30%**.
- High-Scale Mobility (30,000+ B2B Clients):** Architected cross-platform B2B and Sales Engine mobile apps using **Flutter** and **.NET Core**, powering daily sales operations for **30,000+ enterprise clients** and field representatives.
- AI Assistant Integration (75% Paperwork Reduction):** Embedded a custom **AI Assistant** into *UniCoWallet* (digital wallet for 500+ employees), automating approvals and achieving a **75% reduction in physical paperwork**.
- AI-Driven Development Pipeline:** Integrated agentic AI tools (Cursor, Claude, Copilot) into system analysis and code generation pipelines, reducing average feature lead time by 20% through automated boilerplate and unit test generation.
- Orchestrated end-to-end CI/CD pipelines for enterprise Flutter applications**, reducing manual deployment overhead by 40% and streamlining beta testing cycles via Firebase App Distribution.
- System Design & Analysis Leadership:** Led end-to-end system analysis, UI/UX design, and architectural decisions across high-traffic web and mobile projects, ensuring seamless accessibility and performance.
- Enterprise Security & Authentication:** Implemented secure authentication and role-based access control (RBAC) protocols using JWT and OAuth2 across .NET Core backends, ensuring zero-trust data protection for sensitive financial transactions

Jr. Software Developer Nov 2021 – Nov 2022

- **SAP & SFA Workflow Optimization:** Refactored backend microservices connecting SAP ERP and SFA, eliminating data synchronization bottlenecks and automating manual workflows, which boosted overall team productivity by **40%**.
- **Cross-System Data Pipelines:** Engineered RESTful API data pipelines between SAP backends and mobile clients, enabling real-time field order processing and reducing order fulfillment latency by **25%**.

Başarsoft Ankara/Istanbul, Turkey

Software Developer Intern | Jun 2021 – Sep 2021

- **Geospatial Data Rendering:** Engineered interactive geospatial web tools using JavaScript and OpenLayers, enabling real-time visualization of complex spatial data for **20+** enterprise clients.
 - **Performance Optimization:** Optimized vector tile rendering algorithms, reducing map loading latency by **35%** across high-density spatial layers.
-

EDUCATION

- **Anadolu University** — Bachelor of Science in Management Information Systems (*Sep 2021 – Aug 2026*)
 - **Piri Reis University** — Associate Degree in Computer Programming (*Sep 2019 – Sep 2021*)
-
